PhD Candidate · MIT Chemical Engineering | DOE Computational Science Graduate Fellow

Chemical engineering PhD researcher with expertise in pharmaceutical nanotechnology, cheminformatics, and molecular simulation. Accomplished communicator, with 9 peer-reviewed publications, 47+ presentations at conferences and symposia, and 12 award-winning presentations. Experienced fundraiser, securing $330k in scholarships, $380k in fellowships, and $100k in grant funding. Seeking full-time positions in industrial cheminformatics, computational chemistry, or machine learning starting in June 2026.

Education

Massachusetts Institute of Technology (MIT) — **Cambridge, MA**
PhD Chemical Engineering — *2021 – 2026 (expected)*

- Minor: Machine Learning
- Thesis: *Engineering drug nanoparticle formation, structure, and processing for oral bioavailability enhancement*

University of Delaware — **Newark, DE**
Honors B.S. Chemical Engineering with Distinction, GPA: 3.92 — *2017 – 2021*

- Minors: Chemistry, Computer Science
- Thesis: *Computational Modeling of Fluid Flow through Open Cellular Foams and Lattice Structures*

Research Experience

MIT Department of Chemical Engineering — **Cambridge, MA**
PhD Research Fellow, Doyle Group — *2021 – Present*

Deep learning (DL) for molecular property prediction

- Programmed DL models to accurately predict organic solubility, published in *Nature Communications* and featured in MIT News. Resulted in 1 award, 6 invited talks, and 7 other presentations.
- Deployed models through a website, Python package, and Rowan Scientific's platform. Maintain open source code.
- Lead active collaboration with Neopoly Ltd to develop a causal DL architecture for molecular property prediction. Resulted in 3 presentations and a manuscript in preparation.

Molecular dynamics (MD) simulations for nanoformulation design

- Simulated the effects of excipients on nanoparticle crystallinity using MD (open source code), leading to a publication in *ACS AMI*. Recognized with 5 awards, 1 invited talk, and 10 contributed presentations.
- Raised $100k through Koch Institute Frontier Research Program to simulate PROTAC-surfactant interactions using MD and enable efficient PROTAC nanoparticle design.

Hydrogel-based drug delivery systems

- Invented hydrogel encapsulation systems to control release kinetics of nanoparticle-based drugs, published in *Advanced Healthcare Materials* and featured in MIT News. Resulted in 4 awards and 9 presentations.
- Patented process to formulate ultra high-concentration injectable antibody suspensions, leading to a manuscript under review in *Advanced Materials* and an active collaboration with GSK plc.
- Managed 2 undergraduate researchers and 1 technician on daily tasks and project deliverables.

University of Delaware — **Newark, DE**
Undergraduate Researcher, Fromen Group — *2017 – 2021*

- Modeled fluid flow through 3-D printed lattice structures using computational fluid dynamics (CFD) to optimize lattice design, leading to a published manuscript and my undergraduate thesis.
- Determined efficacy of metal organic frameworks (MOFs) nanoparticles as aerosolizable pulmonary drug delivery vehicles, contributing to two published manuscripts. Earned Goldwater Scholarship.

Professional Experience

Eli Lilly and Company — **Boston, MA**
Cheminformatics Intern — *Summer 2025*

- Built ML models to predict lipid nanoparticle (LNP) properties and biological activity. Virtually screened candidate lipids, recommended hits for experimental validation, and discovered new design rules for lipid chemical modifications.
- Deployed ML models to production server, enabling user scientists to access real-time inference. Maintained GitHub repository.

Lawrence Berkeley National Laboratory — **Berkeley, CA**
Machine Learning Intern, Blau Group — *Summer 2023*

- Developed graph-based deep learning models to predict optical nanoparticle properties. Incorporated capability for data augmentation, which improved model accuracy by 27 % (open source code), resulting in a manuscript under review. Presented results at ACS CSSS, MRS Fall Meeting, and MIT Soft Materials Seminar.

Merck & Co. **Boston MA**
Discovery Pharmaceutical Sciences Intern *Summer 2020*

- Created research plan for statistical modeling and multi-scale simulation of a LNP production process.
- Digitized drug candidate risk assessments to standardize data collection and storage for future analysis.

Software Skills

Languages	Python, bash, MATLAB, Git, LaTeX
Machine Learning	Deep learning, Pytorch, sklearn
Cheminformatics	rdkit, mordred, deepchem, chemprop
Molecular Dynamics	GROMACS, CHARMM, PyMOL, xtb
Scientific Computing	High performance computing, slurm, parallelization

Experimental Skills

Nanomaterials	Nanoemulsion design, dynamic light scattering (DLS), scanning electron microscopy (SEM), fluorescent spectroscopy, transmission electron microscopy (TEM)
Pharmaceutical Formulation	nanoparticle suspensions, solubility, controlled release, microencapsulation
Soft Materials	Hydrogel synthesis, rheological characterization, droplet microfluidics
Crystallography	X-ray diffraction (XRD), Raman spectroscopy, differential scanning calorimetry (DSC)

Honors and Awards

Fellowships

- **Chemical Engineering Communication Lab Fellowship**, Massachusetts Institute of Technology 2022 – 2026
- **Rosemary Wojtowicz Fellowship Fund**, Massachusetts Institute of Technology 2021 – 2022
- **Simon (1968) Fellowship Fund**, Massachusetts Institute of Technology 2021 – 2022
- **Computational Science Graduate Fellowship**, U.S. Department of Energy 2021 – 2025
- **Graduate Research Fellowship Program**, National Science Foundation (declined) 2021 – 2024
- **Harward Munson Fellowship**, University of Delaware 2021
- **Summer Scholars Science and Engineering Scholarship**, University of Delaware 2019
- **Summer Research Internship**, NASA Delaware Space Grant Consortium 2018

Awards

- **Pharmaceuticals Travel Award**, MDPI 2024
- **Graduate Student Council Travel Grant**, MIT Graduate Student Council 2024
- **Dow Travel Award**, MIT Department of Chemical Engineering 2024
- **Merck Best Poster Award**, Controlled Release Society Annual Program and Exposition 2024
- **Langmuir Graduate Student Award**, American Chemical Society Colloid and Surface Science Symposium 2024
- **Best Student Seminar Award**, MIT Department of Chemical Engineering 2024
- **National Finalist**, Dissolution Research Presentation International, Society for Pharmaceutical Dissolution Science 2023
- **3rd Place Poster Award**, Virtual Polymer Physics Symposium, American Physical Society 2023
- **Best Poster Award**, Preclinical Form and Formulation for Drug Discovery Gordon Research Conference 2023
- **Future Leaders in Chemical Engineering Symposium Award**, North Carolina State University 2020
- **1st Place, Intern Elevator Pitch Competition**, Merck & Co. 2020
- **2nd Place Poster in Materials Science and Engineering**, AIChE Annual Student Conference 2019
- **General Honors Award**, University of Delaware 2019
- **3rd Place Poster, Biotechnology and Biomedical Career Fair Poster Reception**, University of Delaware 2019
- **National Merit Scholarship Finalist**, National Merit Scholarship Corporation 2017
- **Future Scientist Award**, U.S. Department of Agriculture 2016

Scholarships

- **American Association of University Professors Undergraduate Award**, University of Delaware 2021
- **Robert L. Pigford Undergraduate Award for Chemical Engineering**, University of Delaware 2020
- **NASA Undergraduate Tuition Scholarship**, NASA Delaware Space Grant 2020
- **Engineering Alumni Association Scholarship**, University of Delaware 2020
- **Barry M. Goldwater Scholarship**, The Barry Goldwater Scholarship and Excellence in Education Foundation 2020
- **Trustee Scholarship**, University of Delaware 2017 – 2021
- **Diamond State Scholarship**, Delaware Department of Education 2017 – 2021

Leadership

Massachusetts Institute of Technology **Cambridge, MA**
Graduate Communication Fellow *2022 – Present*

- Awarded prestigious 4-year Chemical Engineering fellowship to lead scientific communication efforts in the department.
- Deliver 3+ workshops on technical communication to department annually. Coach 50+ peers through 120+ hours of appointments.

Committee on Intellectual Property *2024 – Present*

- Recommend MIT-level policy guidelines to improve technology transfer and translation.

Science Policy Advocate *Spring 2025*

- Advocated for science-based policy and federal research support with congressional offices. Covered in MIT News feature.

President, Graduate Christian Fellowship *2022 – 2024*

- Guide student group efforts in service, ministry, fund-raising, and community building as peer-nominated leader.

Graduate Teaching Fellow *Spring 2024*

- Taught 14 students in Chem. Eng. course 10.494B: Therapeutic Nanoparticle Manufacturing, and 16 students in 10.493: Electrochemical Energy.

Gordon Research Seminar **(remote)**
Conference Planning Chair (peer-elected), Preclinical Form and Formulation for Drug Discovery *2023 – 2025*

- Develop conference program focused on applications of computational tools in drug formulation, delivery, and development.
- Communicate with industrial and academic stakeholders to fund-raise and promote conference.

Polygence **(remote)**
Mentor *2022 – Present*

- Supervised 45 high school student research projects from initial design through completion and publication.

University of Delaware **Newark, DE**
President's Strategic Planning Committee, Office of the President *2021*

- Served as the dean-nominated student representative on a cross-functional committee to conduct post-COVID planning.
- Strategized institutional-level changes to incorporate experiental learning and field work into undergraduate curricula.

Public Relations Chair (peer-elected), Engineers Without Borders *2017 – 2021*

- Partnered with international communities to design engineering solutions, including a water distribution system in the Philippines and a well water system in Malawi.
- Developed a corporate sponsorship package to recruit corporate sponsors, managed publication of biannual newsletter, and coordinated press releases with the University Communications Office.
- Mentored underclassmen in academic and career development through formal mentorship program.

Planning Committee (faculty-selected), AIChE Chapter *2019 – 2020*

- Reformed organizational structure of the chapter to streamline workflows and dedicate executive board positions to K-12 STEM Outreach and Diversity & Inclusion.

Publications
